PRODUCT OVERVIEW

The GDS® View™ 13.3” touchscreen monitor lets you take the PC experience on the road. Featuring VESA hole patterns compatible with the RAM-2461U and RAM-D-2461U mounting plates, create a mobile workstation that takes advantage of the GDS® Ecosystem™ for data sync and charging capabilities. The GDS® View™ monitor has undergone MIL-STD-810G 514.5 vibration and MIL-STD810G 516.5 shock testing, ensuring performance in the most demanding environments. This two-point capacitive touchscreen monitor allows you to pinch, zoom, and select – and includes an anti-glare and anti-fingerprint treatment. Control buttons on the front of the monitor are easy to access, while a red monochrome night mode helps to reduce eyestrain. In addition, two integrated 2W speakers allow for audio. Includes HDMI, VGA, and USB Type-B to USB Type-A cables.

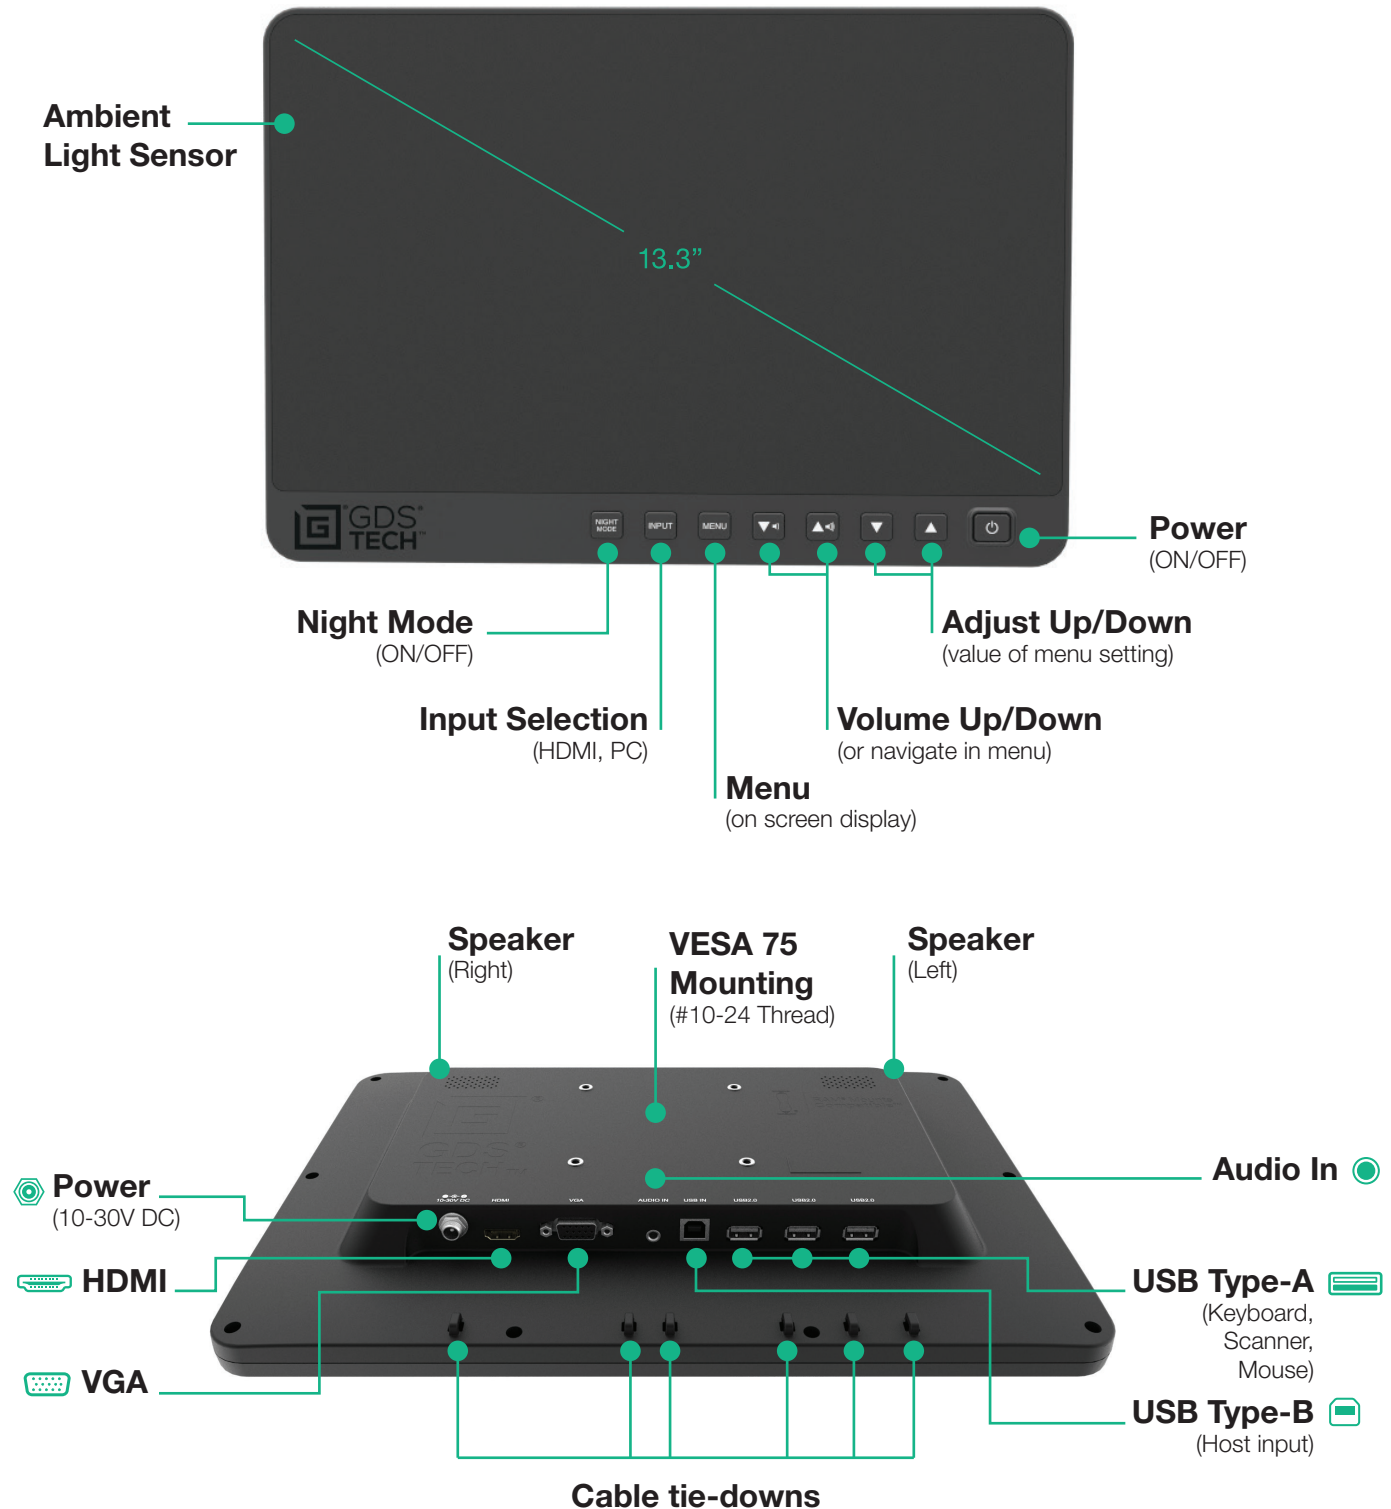

SPECIFICATIONS

Screen Size	13.3”
Screen Type	Anti-glare and Anti-fingerprint treatment applied on LCD
Max Resolution	1920 x 1080 high resolution
Aspect ratio	16:9
Tough Panel	2-point capacitive touch
Audio	(2) 2W Speakers
Brightness	800nits
Contrast ratio	1000:1 / Red monochrome night mode to reduce eye strain for night viewing
Mount Hole Pattern	75 x 75mm VESA
Compliance	Meets ISO-7637-2 Load Dump Compliance CE EMC - EU Directive 2014/30/EU & 2014/53/EU Directive EN 55032, EN 55035 CE-LVD - EC Council Directive of 2014/35/EU. EN 62368
Certifications	MIL-STD-810G 514.6 Vibration, MIL-810G 516.5 Shock Tested FCC, CE, IC, RCM, WEEE, e-Mark, ISO 7637-2, and RoHS
Warranty	1 year warranty
Operating Temp Range	-20°C - +60°C
Storage Temp Range	-20°C - +60°C
Input Voltage Range	10V-30V

MONITOR FUNCTIONS

Press Power Button to turn the power on/off of the monitor – Green back lighting when the power button is ON and video signal is being received from computing device. If the power button is not illuminated then the video signal has been lost or the button is on the OFF position. Ensure the computing source is configured properly to provide the required video signal to the corresponding video output (HDMI output or VGA output). It might be required to toggle the computing device video output to ensure proper signal assignment to the correct port. The Volume UP and DOWN buttons control the audio of the speakers inside the monitor when there is an audio source being provided (if audio input cable is connected to the computing device when using VGA) or when using HDMI.

ON SCREEN MENU ICON GLOSSARY

*Some menu settings only available in specific monitor modes.

-  Brightness
-  Contrast
-  Saturation (HDMI mode only)
-  Tint (HDMI mode only)
-  Phase (PC mode only)

-  OSD Duration – On Screen Display Duration
-  Display Mode (4:3 or 16:9)
-  Auto Adjusting – Ambient Light Sensor
-  Exit Menu

TOUCH SCREEN FUNCTIONALITY

This monitor supports two-point capacitive touch when used with devices that are compatible with a pointing peripheral (such as a mouse or cursor controller). To take advantage of this feature, your device must be connected to the monitor's USB Type-B input port, either directly or through a hub.

NIGHT MODE

When the GDS® View™ Monitor is in Night Mode, adjust the brightness of the screen using the “Adjust Up” and “Adjust Down” buttons.

SETUP & MOUNTING INSTRUCTIONS

This monitor features a 75x75 VESA hole pattern that is compatible with a range of RAM® Mounts components, allowing you to secure the GDS® View™ touch screen monitor and additional peripherals such as the GDS® Keyboard™.

Visit rammount.com/gds-view to build your mount.

TROUBLESHOOTING

- 1 The entire display is slightly zoomed in on the screen, cropping out the corners (HDMI mode).

Press and hold the Menu button for 2-3 seconds. The monitor will adjust the screen size to fit the entire display within the screen.

- 2 The display is significantly misaligned to a point where adjusting the H-Position and V-Position is not enough (PC mode).

Press and hold the Menu button for 2-3 seconds. The monitor will re-calibrate the screen resolution with the device source.

- 3 The monitor is powered on but the screen is black.

Make sure the VGA or HDMI cable is connected properly while using the correct power adapter included with the monitor.

- 4 The screen is displaying the wrong colors.

Check that the cables are securely connected.

- 5 For other issues, enter the menu and choose  to reset the monitor.
